

New New New New New New New

## 4T CONSOLE

With the new **4T** console, control the door with your fingertips as easily as a light switch.

4 buttons to control, to adjust and be informed about door status.

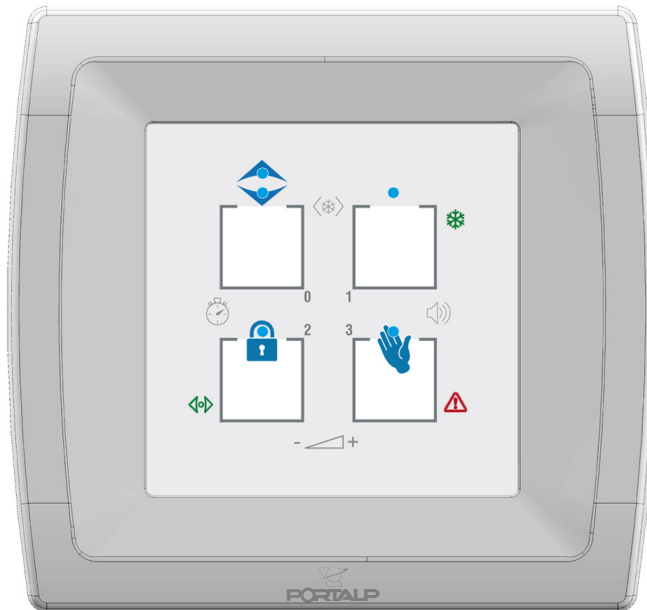

As a mode selector, adjustment console and events analysis tool, the 4T console is a 3 in 1 control system that is simple and convenient for the user.

## SIMPLE & FUNCTIONAL

In appearance, the 4T console looks like a standard switch: a square design, with rounded corners and in a light colour to fit in discretely and elegantly for surface fitting or flush fitting in a standard box.

Technically, 4 buttons and LEDs to control and adjust the door:

- A choice of 6 running modes:
  - » Automatic, Entry, Exit, Opened, Closed and Manual
- 3 types of opening :
  - » Wide opening, Reduced opening and Security opening
- 3 adjustments :
  - » Opening time,
  - » Reduced opening width,
  - » Buzzer active or not
- Secured keypad access (by code or external contact)
- Resetting
- Signalling and events analysis

Scale 1:1
